Scoil Naomh Fiachra Clontubrid Roll No. 16865D

Updated Risk Assessments to minimise the risk of being exposed to Covid-19

The process involved consultation with all school staff.

Methodology used for hazard identification and control

In line with the requirements of Safety, Health and Welfare at Work Act 2005 (section 19) it is the policy of the BoM in **Scoil Naomh Fiachra** to address significant hazards and risks in the workplace, to access the risks to safety, health and welfare and to control these risks as far as is reasonably practicable.

The Board is committed to the ongoing identification of hazards, the assessment of the appropriate risks and the introduction of controls to deal with them. In addition, staff are involved and participate in safety, health and welfare issues within the school and are encouraged to identify and report any potential hazards that may exist and to ensure that a risk assessment is carried out.

This revised Risk Assessment includes all relevant updates and necessary control measures to minimise the risk of staff and others being exposed to Covid-19 and these will be incorporated into the Safety Statement for St. Projects in line with requirements of section 20 of the 2005 Act.

It is envisaged that additional reviews will be undertaken on a regular basis and in line with Government and public health advice to ensure that all information remains accurate, that controls are appropriate and where necessary risks are reassessed.

A **hazard** is anything with the potential to cause harm to the safety, health or welfare of staff, students, visitors and contractors – a wet or slippery floor, an unguarded machine, stressful work, a blocked entrance, hazardous chemicals etc. Hazards may be classified as physical, chemical, biological, environmental or human.

A **risk** is the likelihood that someone will be harmed by a hazard and the severity of that harm.

Control measures:

A control measure is an applied measure that reduces the level of risk. Control measures can be applied at the planning stage, can comprise physical measures, can be management issues and can include training. Good control measures will require a combination of some or all of these.

Control measure principles:

Schedule 3 of the Safety, Health and Welfare at Work Act 2005 lists the Principles of Prevention and the Board of Management undertakes to apply these principles (where practicable) in dealing with all risks within the school:

- Avoidance of risks
- Evaluation of unavoidable risks
- Combating of risks at source
- Adaptation of work to the individual
- Adaptation of workplace to technical progress
- Replacement of dangerous articles, substances or systems of work by safe or less dangerous articles, substances or systems of work
- Priority to collective protective measures over individual protective measures
- Development of an adequate prevention policy which takes account of technology, organisation of work, working conditions, social factors and the influence of factors relating to the working environment
- Appropriate training and instructions to employees.

When the safety audit identifies hazards, it is necessary to evaluate and rank them so that they can be controlled in an orderly way. The risk of a hazard is a measure of the likelihood or probability of an accident coupled with the severity of the injury or loss. The risk potential of each hazard was assessed (by ranking) by giving numerical values of between 1 and 5 to both the **severity** of the consequences and the **probability** of the event occurring. When the severity numerical factor and the probability numerical factor were multiplied together, they produced a number between 1 and 25 thereby producing the numerical values outlined in **risk rating** chart below.

Severity x Probability = Risk Rating Severity

Severity Rating	Interpretation	Numerical Value
Fatality or Catastrophic	Single or multiple fatalities, widespread illness, large scale property or equipment damage	5
Major	Serious injury or illness, significant property or equipment damage	4
Moderate	Injury and damage to property	3
Minor	Minor injury or illness, minor property or equipment damage	2
Trivial	No significant injury or illness, no significant property or equipment damage	1

Probability/Likelihood

Probability Rating	Interpretation	Numerical Value
Inevitable	Likely to occur either immediately or in the short term	5
Very Likely	Could occur in time or if repeated enough	4
Likely	Likely to occur	3
Unlikely	Though unlikely, may occur over time	2
Rare	Unlikely to occur at all	1

Risk Rating

Numerical Value Severity x Probability	Descriptive risk rating	Interpretation
16 – 25	Emergency – Extremely serious	Risks are unacceptable and immediate action required justifying special
	If an incident were to occur, it would be likely	maintenance. Activity should be halted and stopped until the hazard is
	that a permanent, debilitating injury or death	eliminated or appropriate risk controls are put in place.
	would result	
11 – 15	Severe and Serious	Activity can proceed but substantial efforts should be made to reduce the
	If an incident were to occur, it would be likely	risk. Risk reduction measures should be implemented urgently within a
	that an injury requiring medical treatment would	defined time period and it might be necessary to consider suspending or
	result.	restricting the activity or to apply interim control measures until this has
		been completed.
6 – 10	Medium	Activity can proceed but consideration should be given as to whether the
	If an incident were to occur, there would be	risks can be lowered. Control measures must be monitored and reviewed as
	some chance that an injury requiring First Aid	required to ensure they remain suitable and sufficient.
	treatment would result	
1-5	Trivial or Negligible	No additional controls are necessary as these risks are considered
	If an incident were to occur, there would be little	acceptable. Activity should be regularly reviewed to ensure there is no
	likelihood that an injury would result	change to the risk rating and that controls are maintained.

*Note: A numerical rating has been used in column 4 of the risk assessment sheets to describe the risk potential for the hazard identified This method has been used in an attempt to ensure that the levels of risk will be understood and clear to all those operating within the school.

Covid-19 Policy Statement

Scoil Naomh Fiachra is committed to providing a safe and healthy workplace for all our staff and students. To ensure that, the Board of Management have developed a Covid-19 Response Plan and updated the Safety Statement for the school. All staff and pupils are responsible for the implementation of the response plan and a combined effort will help contain the spread of the virus. The Board of Management will:

- continue to monitor our Covid-19 response and amend this plan in consultation with our staff, pupils and parents/guardians
- provide up to date information to our staff, pupils and parents/guardians on the Public Health advice issued by the HSE and Gov.ie
- display information on the signs and symptoms of Covid-19 and correct hand-washing techniques
- provide an adequate number of trained Worker Representative(s) who are easily identifiable and put in place a reporting system
- inform all staff and pupils of essential hygiene and respiratory etiquette and physical distancing requirements
- adapt the school to facilitate physical distancing as appropriate in line with guidance of the Department of Education and Skills
- keep a log of contact of staff and pupil engagement to help with contact tracing
- ensure staff and pupils engage with the online induction/familiarisation briefing provided by the Department of Education and Skills
- implement the agreed procedures to be followed in the event of someone showing symptoms of Covid-19 while at school
- provide instructions for staff and pupils to follow if they develop signs and symptoms of Covid-19 during school time in line with the procedures provided by the Department of Education and Skills
- implement cleaning in line with government advice and agreed checklists

All staff, pupils and parents/guardians will be consulted on an ongoing basis and feedback is encouraged on any concerns, issues or suggestions.

Who may be affected?	Identified Risks		Cleaning a space with a suspected/confirmed case of Covid-19 (continued) Controls	Risk Rating with controls	Action implementation
Staff Pupils Visitors	Persons currently deemed most at risk of complications if they catch the coronavirus are: • 60 years of age and over • have long-term medical conditions – i.e. heart disease, lung disease, high blood pressure, diabetes or cancer • pregnant women Known effects of the coronavirus: • A fever (high temperature of 37.5 degrees Celsius or above) • A cough - this can be any kind of cough, not just a dry cough • Shortness of breath or breathing difficulties • Loss of sense of smell • Loss of sense of taste or distortion of sense of taste • Death	✓ Waste Ma ✓ ✓	Wash items in accordance with the manufacturer's instructions. Use the warmest water setting and dry items completely. Dirty laundry that has been in contact with an unwell person can be washed with other people's items. Do not shake dirty laundry as this minimises the possibility of dispersing the virus through the air Clean and disinfect anything used for transporting laundry with your usual products, in line with the cleaning guidance outlined above **magement** Waste should be put in a plastic rubbish bag and tied when full The plastic bag should then be placed in a second bin bag and tied It should be put in a suitable and secure place and marked for storage until the individual's test results are known All waste should be stored safely and kept away from children. You should not put waste in communal waste areas until negative test results are known or the waste has been stored for at least 72 hours If the individual tests negative, the waste can be put in with the normal waste. If the individual tests positive, then store it for at least 72 hours and put in with the normal waste.	Serious Requires monitoring	Board of Management Principal Cleaning staff
Risk Level Calculation (a) Severity of risk/inju (b) Likelihood of even (c) Risk Rating = (a) X	ury 1=trivial, 2=slight, 3=modera at 1=rare, 2=unlikely, 3=likely,
